

CNL Strategic Capital seeks to acquire durable private companies that align with strict investment criteria, partnering with these companies to build enduring value.

## Historical Volatility Comparison

**ANNUALIZED  
VOLATILITY**  
(Averaged Over  
04/2018-12/2024)

## Historical Correlations

**CNL STRATEGIC  
CAPITAL  
CORRELATION  
TO VARIOUS  
INDICES**  
(04/2018-12/2024)

Non-traded investments are not valued as frequently as traded markets, which impacts volatility measures. Asset valuations will be estimates of fair value and do not represent the amount an investor would receive now or at any time in the future. The benchmark indices are not investments, but inform on macro market trends. Past performance is not indicative of future results. In presenting the historical volatility and historical correlations for these indices, CNL Strategic Capital used the month end values in the respective calculations. The time period shown above was chosen based upon CNL Strategic Capital's commencement of operations date. Short-term volatility can amplify fluctuations in specific indices.

Calculated using class I Shares which are not available to all investors and do not have selling commissions and dealer manager fees. Indices do not address investment costs. There are significant differences between public and private equities, which include but are not limited to the following: public equities can provide liquidity and greater access to company information and private equities have a longer time horizon and are considered illiquid. Data represents a variety of broad-based and recognizable indices and is intended to show performance in different asset classes. Risk/reward profile for each asset class varies significantly. SOURCE: Bloomberg, as of Dec. 31, 2024. (Refer to the dataset for additional information.)

Data as of Dec. 31, 2024. There is no assurance the stated objectives will be met.

<sup>1</sup> CNL Strategic Capital's strategy is to use fund leverage in an amount not to exceed 35% of its gross assets; however, CNL Strategic Capital may exceed the 35% at any time, if approved by a majority of our independent directors. Separate from the fund's leverage, certain businesses in its portfolio have third-party debt.

<sup>2</sup> Age of the companies range from 12 years to 96 years.

<sup>3</sup> The average management team ownership is calculated based on direct investments. Management's ownership of the companies they operate range from 3.6% – 43.0%.

<sup>4</sup> A substantial portion of CNL Strategic Capital's assets may be invested in a limited number of businesses. Totals may not equal 100 due to rounding.

Data as of Dec. 31, 2024. Holdings may change at discretion of the adviser and there is no guarantee any investment will meet its objectives.

<sup>5</sup> Ultimed, Inc. is owned by Healthcare Safety Holdings LLC.

Please read the prospectus, including the Risk Factors section, for full details.  
The prospectus is available at [sec.gov](http://sec.gov) and [cnlstrategiccapital.com](http://cnlstrategiccapital.com), or may be obtained by calling 866-650-0650.

## RISK FACTORS

- **Offering Risk.** An investment in CNL Strategic Capital, LLC is considered speculative and involves a high degree of risk, including the loss of all or a substantial amount of your investment. CNL Strategic Capital's offering is on a best-efforts basis. There is no guarantee that CNL Strategic Capital will raise additional funds; therefore, it may not be able to acquire targeted assets, which reduces diversification and increases the potential of volatility.
- **Investment Objective Risk.** There is no assurance the investment strategy or objectives of CNL Strategic Capital will be achieved. Inability to invest the net offering proceeds on acceptable terms, consistent with the business strategy and within the time frame contemplated by the offering may exist. CNL Strategic Capital may face risks with respect to the evaluation and management of future acquisitions.
- **Undue Reliance on Managers or Past Performance.** CNL Strategic Capital Management, LLC is acting as the manager. The sub-manager is Levine Leichtman Strategic Capital, LLC, an affiliate of Levine Leichtman Capital Partners, LLC (LLCP). Each managing entity is an investment adviser registered with the U.S. Securities and Exchange Commission. Investors should not rely on the past performance of the managers and their respective affiliates as an indication of future performance. CNL Strategic Capital is a different investment vehicle with fees and risks dissimilar to the managers' other funds and this is the first time the managers have partnered together.
- **Conflicts of Interest Risk.** CNL Strategic Capital's managers and their respective affiliates face conflicts of interest, including those that result from compensation arrangements and allocations of business opportunities. See the prospectus for details. CNL Strategic Capital pays substantial fees and expenses to the manager, the sub-manager, the managing dealer or their respective affiliates. These payments increase the risk that investors will not earn a profit on their investment. In certain cases, CNL Strategic Capital will invest alongside the sub-manager, its affiliates and third parties. Co-investing with other investment groups will increase the risk that third parties may make decisions with which CNL Strategic Capital does not fully agree. CNL Strategic Capital will not purchase these businesses unless a majority of the independent directors determines the transaction is fair and reasonable.
- **Inability to make Distributions Risk.** Distributions are not guaranteed in frequency or amount. Distributions paid are not solely based upon performance. Distributions may be funded from multiple sources, including but not limited to, offering proceeds, borrowings, net investment income and expense waivers. Distributions that are not derived from net income produced by performance may not be sustainable and may dilute investors. Subject to certain conditions being met, CNL Strategic Capital is obligated to repay expense support to the managers over several years, which would reduce future income available for distributions.
- **Use of Leverage Risk.** CNL Strategic Capital's strategy is to use fund leverage in an amount not to exceed 35% of its gross assets; however, CNL Strategic Capital may exceed the 35% at any time, if approved by a majority of its independent directors. Separate from the fund's leverage, certain businesses in its portfolio have third-party debt. The use of leverage and its limits are subject to change.
- **Valuation Risk.** Asset valuations will be estimates of fair value, which is calculated from CNL Strategic Capital's financial statements prepared in accordance with GAAP, and do not represent the amount an investor would receive now or at any time in the future. CNL Strategic Capital's estimate of fair value for the portfolio is inherently subjective, and the net asset value (NAV) may not accurately reflect the actual price at which its assets could be liquidated. The realized value of shares will be dependent upon market conditions that are beyond anyone's ability to control or predict.
- **Liquidity Risk.** An investment in CNL Strategic Capital is illiquid. Shares sold in this offering will not be listed on an exchange or quoted through a quotation system for the foreseeable future, if ever. If investors are able to sell their shares, they may receive less than their purchase price. The share repurchase program has numerous restrictions and offers redemptions up to 2.5% of CNL Strategic Capital's aggregate NAV per calendar quarter and up to 10% of the aggregate NAV for the prior four quarters. The board of directors may suspend or modify the program at any time.
- **Past performance is not indicative of future results.**
- An investment in CNL Strategic Capital does not provide investors with a direct ownership interest in the underlying businesses. Controlling interests in privately held businesses, by nature, pose certain incremental risks as compared to public companies, including less access to capital, reduced financial reporting transparency and fewer regulations, which could impact the complex business valuations.
- CNL Strategic Capital will be dependent upon earnings and cash flow from the businesses it acquires in order to generate earnings and cash flow to, first, satisfy its financial obligations and second, to make distributions to shareholders.

## GENERAL NOTICES

- Broker-dealers and investment advisors are reminded that CNL Strategic Capital's communications must be accompanied or preceded by a prospectus.
- This is not an offer to sell nor a solicitation of an offer to purchase the securities described herein. Only the prospectus makes such an offer. This material should be read in conjunction with the prospectus in order to fully understand the investment objectives, risks and charges associated with an investment.
- This offering is not suitable for everyone; investors are expected to meet the minimum financial suitability standards. CNL Strategic Capital is not a short-term investment.
- CNL Strategic Capital, LLC is a direct participation program, taxed as a partnership.
- Managing dealer of CNL Strategic Capital is CNL Securities Corp., member FINRA/SIPC. CNL Securities and its associates cannot provide investment advice for any individual or any individual situation and are not acting in a fiduciary capacity. Contact your financial professional to learn more about CNL product offerings and how they may complement and help diversify your portfolio. Investments should be chosen based on your individual objectives, risk tolerance and goals.
- Neither the U.S. Securities and Exchange Commission, the Attorney General of the State of New York, nor any other state regulator has passed on or endorsed the merits of this offering. Any representation to the contrary is unlawful.

## DATASET INFORMATION

- The S&P 500 Total Return Index focuses on the large-cap sector of the public equity market in the United States.
- The FTSE Nareit Equity real estate investment trust (REIT) Total Return Index is a free-float adjusted, market capitalization-weighted index of U.S. equity traded REITs only. Constituents of the index include all tax-qualified REITs with more than 50% of total assets in qualifying real estate assets. Non-traded REITs are not included in this index.
- The Bloomberg U.S. Aggregate Bond Index measures the investment grade, USD-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities and commercial mortgage-backed securities (agency and nonagency).
- The Bloomberg U.S. Corporate High Yield Total Return Index measures the USD-denominated, high yield, fixed-rate corporate bond market.
- The Russell 2000® Total Return Index measures the performance of about 2,000 small-cap U.S. equities.
- Standard Deviation (volatility) is a measure of investment volatility. Volatility refers to the amount of uncertainty or risk related to the size of changes in a security's value. A higher volatility means that a security's value can potentially be spread out over a larger range of values. This means that the price of the security can change dramatically over a short time period in either direction. A lower volatility means that a security's value does not fluctuate dramatically and tends to be more steady. Because non-traded investments are not valued as frequently as traded markets, volatility measures are impacted. When presenting historical volatility comparisons throughout the presentation, month end values were used.
- Correlation is a statistical measure of how two securities move in relation to each other. Perfect positive correlation (a correlation co-efficient of +1) implies that as one security moves the other security will move in lockstep, in the same direction. Alternatively, perfect negative correlation (a correlation co-efficient of -1) means that securities will move by an equal amount in the opposite direction. If the correlation is 0, the movements of the securities are said to have no correlation; their movements in relation to one another are completely random.
- Investments cannot be made directly into an index. An index is a composite of securities that provides a benchmark for performance. Indexes are unmanaged, do not incur management fees, costs, or expenses and cannot be invested in directly.
